Statement:

We the people of this enormous area of land, water, airspace and vast resources, like oil, timber, seafood, and minerals is Alaska, our home. Like the land we are unique and diverse but care about what happens with our environment. Alaskan Natives who are indigenous people that have inhabited the interior, coastal regions and tundra for tens of thousands years. Alaskan Natives represent about 24% of the population but gather and harvest just under 2% of the total subsistence uses. I will support increases in subsistence up to 20% to help reduce the high costs of living in rural villages. I will support the implementation of clean energy like solar and wind power, and growing hydroponic fruits and vegetables throughout rural Alaska. I will support additional increases of tribal courts and tribal judges in rural Alaska due to the domestic violence and alcohol/drug abuse. I will support rural education, infrastructure and community projects throughout all of Alaska.

In Alaska we have no factories, yet we have the highest cost of living. We need job security, better roads, improved living standards all over the state.

Every man, woman and child in Alaska deserves a honest and mature representative who will fight for an increase in the minimum wage to \$15.00 an hour to help struggling residents and families improve their income levels.

I will oppose the federal cuts in social security that affects all retirees and their families across the nation. Please vote.
