Statement:

The future of Alaska is uncertain and we need strong, new leadership in the State Senate.

I'm running to change our leadership, to resolve our fiscal crisis and put our state back on track. The skills I put to work as borough mayor, I will bring to Juneau. I listened to all sides, made hard choices, and put our borough on a path to success. As Senator, I will do the same for all Alaska.

Our youth must have a bright future where educational opportunities can meet their needs and develop skills for a changing environment. This will require a strong and stable K-12 and University system. The UAF Engineering Building must not stand idle while a new Anchorage legislative office gets millions more.

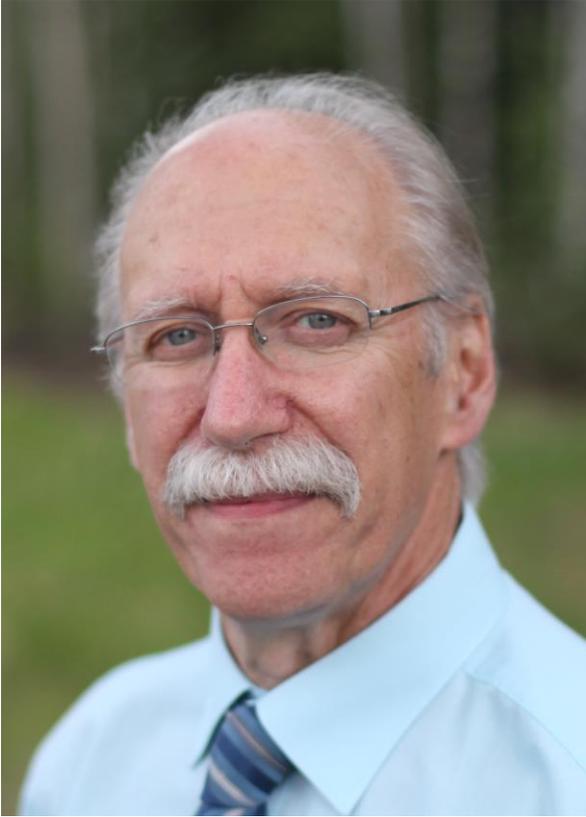

We must develop a natural gas supply for a sustainable energy future in the Interior. Our families and businesses must share in the benefits of low cost gas that others have received. Alaskans must continue to develop our natural resources for the maximum benefit of all.

I will join with others to unite the legislature and Alaska behind a solution to our deficit crises to make Alaska's budget sustainable. I will fight to create Alaskan jobs with a capital budget and the construction projects we need for a diverse and thriving economy.

The Alaska legislature needs to secure a better future. I have the record of success to bring positive solutions to Juneau.
